CSS Font Properties

Property	Units	Description
`font-size`	`px` `em` `rem` `vw` `vh`	Size of the font
`line-height`	`px` `em` `rem` `unitless`	Leading / spacing between lines
`font-weight`	`normal` `bold` `100` `200` `300` ... `800` `900`	Weight of the font.
`font-style`	`normal` `italic`	Choose Normal or Italic.
`text-transform`	`none` `uppercase` `lowercase`	Capitalization.
`letter-spacing`	`px` `em` `rem`	Space between letters
`word-spacing`	`px` `em` `rem`	Space between words

notes:

- `line-height` differs from leading. In design leading will not effect 1 line of text. `line-height` however will change how 1 line of text is rendered.
- To derive `letter-spacing` from design programs take the value and divide by 1000 and set that value in ems.
  - 40 -> `letter-spacing: 0.04em`
